SUMMARY

Product Manager with 6.5 years shipping B2B SaaS products in HR Tech and EdTech. Former backend engineer - I own discovery, data models, and delivery end-to-end. I build self-service tools, AI workflows, and enterprise systems that remove operational friction and create measurable business outcome.

EXPERIENCE

Akrivia *Hyderabad, India*
Associate Product Manager Apr 2024 – Feb 2026

Sole PM for performance management, goal management, role architecture & custom reporting - 50+ mid-market & enterprise clients.

- Cut reporting turnaround from 48 hrs to near-instant and eliminated 100% of reporting CS tickets by shipping a self-service reporting product with a custom data warehouse schema and 5 report types across 2 phased releases.
- Saved every HRBP ~20 hrs/month by designing an AI skill-gap workflow - LLM for fuzzy matching, rules for hard thresholds, HRBP review gate before any output reaches employees; reduced manual HR ops by ~50%.
- Reduced client onboarding config time ~90% (1 day → 1 hour) by architecting an RBAC Assignment Groups layer that consolidated 40–45 duplicate roles into 8 across enterprise accounts.
- Drove 30% increase in year-round goal completion by redesigning the Goal Plan Template data model to decouple time periods from frameworks, enabling multi-OKR participation for all enterprise clients.
- Saved engineering cycles on 2 features by building an AI governance framework that redirected them from LLMs to simpler rules-based solutions.

AccioJob *Gurugram, India*
Technical Product Manager Dec 2022 – Jan 2024

Built employer & student-facing product features on a B2C + B2B EdTech hiring platform, growing from 20K to 30K daily active users.

- Grew daily sign-ups ~50% (20K → 30K) and achieved 3x platform engagement improvement through A/B experiments on the student onboarding flow.
- Contributed to ~8–12% revenue growth by launching an assessment product that gave students - job readiness scores and hiring teams – candidate's capability scores from in-platform assessments.
- Improved D7 retention +20% during campaign periods by shipping Code vs Clock - a live competition feature that gave students a real-time reason to return.
- Reduced repeat production incidents from 3–4/quarter to 1 by introducing a structured RCA process that shifted the team from reactive fixes to systemic prevention.

Phenom *Hyderabad, India*
Product Development Engineer I (Backend | Product) Jul 2021 – Dec 2022

- Built ML recommendation APIs powering personalised career discovery on an enterprise HR SaaS platform; this engineering-to-PM bridge role directly shaped the technical product approach carried forward.

Amazon *Noida, India*
Customer Service Associate (Product Insights | Operations) Sep 2018 – Jun 2021

- Handled 10,000+ customer interactions across global markets; identified recurring pain patterns and communicated structured feedback to process teams - an early form of product discovery.

SKILLS

Product: Roadmap ownership, PRDs, OKRs, A/B experimentation, discovery, go-to-market, stakeholder management

User Research & UX: Customer Interviews, Journey Mapping, Usability Testing, UX Collaboration, Wireframing, Competitive Analysis

Data: SQL, funnel analysis, data warehouse design, self-service reporting, product metrics

AI: LLM workflow design, prompt/context engineering, AI governance, async/batch architecture

Tech: APIs, RBAC/permission systems, multi-tenant SaaS, Java, MongoDB

Tools: Figma (basic), Cursor AI, Agile (Scrum/Kanban)

EDUCATION

JSS Academy of Technical Education *Noida, India*
Bachelor of Technology in Instrumental & Control Engineering 2013 – 2017

- Top 5% of batch | Published research project at IIT Delhi | MUN representative

CERTIFICATIONS

- IBM AI Product Manager Professional Certification | 2026
- Full Stack Web Development (MERN) | 2021
